-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This Office Action is in response to the applicants' communication received on August 18, 2006.
2. Claims 1-20 are presented for examination.
3. The applicants have amended claims 1-13, 15, and 17 and have added new claims 18-20 in the amendment received on August 18, 2006.
4. Applicants' arguments with respect to claims 1-20 have been considered but are deemed to be moot in view of the new grounds of rejection.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1, 5, and 10-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 5, and 10-12 comprise an algorithm that begins with a Start Transaction and an IF conditional statement. These statements are conditional statements within an algorithm. These statements are a part of a series of looping statements. These looping statements do not contain an end to the conditional statements that would enable the statements to produce a positive result. It is the examiner's request to the applicants, that the applicants should kindly consider placing

Art Unit: 2167

a statement after these conditional statements, in an effort to have the algorithm fall out of the loop with a statement that contains positive results.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

9. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Robertson et al. (Publication No.: US 2005/0240621 A1 filed June 24, 2005, priority to provisional application no. 60/206,564 filed on May 22, 2000, hereinafter Robertson).

10. Regarding Claims 1, 5, and 10-12, Robertson teaches a method and system for managing partitioned data resources.

The method and associated system for managing partitioned data resources as taught or suggested by Robertson includes:

nested transaction encapsulates between a StartTransaction operation (paragraphs 0275-0277) and a corresponding EndTransaction operation (paragraphs 0275-0277) on a hierarchy or further StartTransaction operations corresponding to further EndTransaction operations on nesting levels (paragraphs 0275-0277), a façade library (paragraph 0294) provides access from an object oriented environment to a

relational database system, having a transaction object comprises a depth counter (paragraph 0325), a CommitTransaction operation (paragraph 0232), and a Rollback Transaction operation as object methods (paragraph 0204), StartTransaction on the first level (paragraphs 0275-0277) and issuing a corresponding operation only if StartTransaction operation is on the first level of the nested transaction (paragraphs 0275-0277).

11. Regarding Claims 2-4, 6-9, and 13-20, the limitations of these claims have been noted in the rejection above. They are therefore rejected as set forth above.
